Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed Jan. 27, 2003 have been fully considered but they are not persuasive.

In re pages 1-2, applicants argue that the term "absolute value independent" is consistent with the specification because the shape detector, as described in pages 12-13 of the specification, utilizes slope analysis of the various time-varying and non-time varying portions. By performing inversion, as in Pletz-Kirsch US 5,053,869, the slope analysis would not be accurate. The invention requires a direct analysis of the various time varying and non-time varying portions to determine whether a synchronization pulse exist amongst a plurality of non-synchronizing pulses. Note inversion is analogous to performing an absolute value operation because all negative values associated with a sample are inverted to position.

In response, the examiner respectfully disagrees. First at all, it is not clear that, at the time of filing this application, applicants rely on Pletz-Kirsch US 5,053,869 to support the lack of disclosure.

Finally, the alleged inversion is **not necessary analogous** to performing an absolute value operation because the inversion could invert **all positive values** associated with a sample to **negative values**. Accordingly, the term "absolute value independent" is not described in the specification in such a way as to reasonably convey to one of ordinary skill that the inventors had possession of the claimed invention.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 17-28 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 17-28 recited "absolute value independent" which were not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed had possession of the claimed invention. It is noted that the original specification discloses only "level" portions and "transition" portions of the video signal but not "absolute" values of the video signal.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
